### Orangutan Facts

Orangutans live in **INDONESIA** and Malaysia on the islands of **BORNEO** and Sumatra. Orangutans are **ENDANGERED** and these are the only places where wild orangutans live in the rainforest, which is being cut down for wood to make paper and furniture and the land cleared to grow **PALM OIL** for using as fuel and as an ingredient in lots of foods. It is thought that Sumatran **ORANGUTANS** may become **EXTINCT** in the next 50 years unless people help to protect them.

Orangutans are a Great **APE** along with gorillas, chimpanzees and bonobos. Apes don't have **TAILS** whereas most monkeys do. They mostly eat **FRUITS** – and their favourites are huge spiky fruits called *Durian*, which actually westerners think smell very bad. Orangutans sleep in **NESTS** in the trees which they make every day from leaves and branches.

SOS visits schools and villages in **SUMATRA** to talk to people about orangutans and their **HABITAT** and we to give tree **SEEDLINGS** to schools so that children can replant the **FORESTS** around their villages. We are also replanting trees inside the **GUNUNG** Leuser National Park to restore the forest for orangutans.
